Section I: Introduction

The Performance-Based Monitoring Analysis System (PBMAS)

The PBMAS is a district-level, data-driven monitoring system developed and implemented annually by Performance-Based Monitoring (PBM) staff in coordination with other Texas Education Agency (TEA) divisions and departments. The 2018 PBMAS Manual is intended to serve as a comprehensive technical resource for the PBMAS, which is used by TEA as one part of its annual evaluation of school districts'¹ performance and program effectiveness.

Guiding Principles of the PBMAS

The PBMAS is based on the following guiding principles:

School District Effectiveness. PBMAS is intended to assist school districts in their efforts to improve local performance.

Statutory Requirements. PBMAS is designed to meet statutory requirements.

Indicator Design. PBMAS indicators reflect critical areas of student performance, program effectiveness, and data integrity.

Maximum Inclusion. PBMAS evaluates a maximum number of school districts by using appropriate alternatives to analyze the performance of districts with small numbers of students.

Individual Program Accountability. PBMAS is structured to ensure low performance in one program area cannot be offset by high performance in other program areas or lead to interventions in program areas where performance is high.

High Expectations. PBMAS promotes high expectations for all students in all school districts. PBMAS cut points will be adjusted over time to ensure continued student achievement and progress.

Annual Statewide Evaluation. PBMAS ensures the annual evaluation of all school districts in the state.

Public Input and Accessibility. The design, development, and implementation of the PBMAS are informed by public input received through stakeholder meetings, the public comment period included in the annual rule adoption of PBMAS manuals, and ongoing Texas Education Telecommunications Network (TETN) sessions. The performance information PBMAS generates is available to the public.

System Evolution. PBMAS is a dynamic system in which indicators are added, revised, or deleted in response to changes and developments that occur outside of the system, including new legislation and the development of new assessments.

Coordination. PBMAS is part of an overall agency coordination strategy for the performance-based evaluation of school districts.

¹ Unless otherwise noted, the term districts includes open-enrollment charter schools.

Changes to the PBMAS in 2018

The 2018 PBMAS includes several key changes from the 2017 system. Many of these changes are marked in the manual as “*New!*” for easy reference. Detailed information about specific indicators is included in Section III of this manual.

The availability of an additional year’s data enables the Special Analysis component to be reinstated for all English language arts (ELA) State of Texas Assessments of Academic Readiness (STAAR®)² end-of-course (EOC) indicators.

Bilingual Education and English as a Second Language (BE/ESL)

For 2017 and prior, the composite ratings were calculated using, in part, the student’s Texas English Language Proficiency Assessment System (TELPAS) Listening and Speaking (grades 2-12) performance as determined by a holistic rating system. In 2018, the composite ratings will instead use the student’s TELPAS Listening and Speaking performance as determined by the new item-based standardized assessments. Due to this change and the timing of standard setting in late summer, BE/ESL Indicator #8 (TELPAS Reading Beginning Proficiency Level Rate) and BE/ESL Indicator #9 (TELPAS Composite Rating Levels for Students in U.S. Schools Multiple Years) are Report Only for the 2018 PBMAS.

Career and Technical Education (CTE)

Coding for the CTE Tech Prep program was discontinued in the 2016-2017 Texas Student Data System (TSDS). The CTE Tech Prep bubble, however, was available on the Summer 2017 STAAR EOC answer documents. Any STAAR EOC Summer answer document submitted with the CTE Tech Prep bubble marked (CTE indicator code 3) will be included in the accountable district’s results for the relevant PBMAS CTE STAAR EOC indicator(s).

Performance levels will be assigned for CTE Indicator #7 (CTE Nontraditional Course Completion Rate – Males) and CTE Indicator #8 (CTE Nontraditional Course Completion Rate – Females) in the 2018 PBMAS. Appendix A in this manual reflects a modified course list for CTE Indicator #8 CTE Nontraditional Course Completion Rate – Females; two courses listed in the 2017 PBMAS were deleted.

Every Student Succeeds Act (ESSA)

For the 2018 PBMAS, there are no changes specific to the ESSA program area. However, indicators in this program area are being implemented based on the overall changes described in this manual that affect all PBMAS program areas in 2018.

Special Education (SPED)

In the 2017 PBMAS, three Significant Disproportionality (SD) indicators, SPED Representation (Ages 3-21), SPED Regular Class <40% Rate (Ages 6-21), and SPED Separate Settings Rate (Ages 6-21), were implemented and reported based on federal regulations requirements under 34 Code of Federal Regulations (CFR) Part 300. In addition, five discipline indicators, SPED OSS and Expulsion ≤10 Days Rate (Ages 3-21), SPED OSS and Expulsion >10 Days Rate (Ages 3-21), SPED ISS ≤10 Days Rate (Ages 3-21), SPED ISS >10 Days Rate (Ages 3-21), and SPED Total Disciplinary Removals Rate (Ages 3-21), also have been implemented based on the federal regulations 34 CFR Part 300 and were previewed in the 2017 Discipline Data Validation system. These five discipline SD indicators have been added as SPED Indicators #12 - #16 in the 2018 PBMAS Manual. All SD indicators mentioned here will be implemented continually based on 34 CFR Part 300. Districts designated as SD (Year 1) or SD (Year 2) will be reported in the 2018 PBMAS. SD (Year 1) reflects a district which first received

an SD designation in 2018 and not in the previous year. SD (Year 2) reflects a district which received an SD designation for both 2018 and the previous year.

For all SPED SD Indicators #9 - #16, districts designated as SD (Year 1) or SD (Year 2) in the 2018 PBMAS report are only for information and planning purposes.

The order for SPED Annual Dropout Rate (Grades 7-12), SPED Graduation Rate, SPED Regular Early Childhood Program Rate (Ages 3-5), SPED Regular Class $\geq 80\%$ (Ages 6-21), SPED Regular Class $< 40\%$ (Ages 6-21), and SPED Separate Settings Rate (Ages 6-21) indicators have been changed in the 2018 PBMAS Manual.

Planning for the Future: 2019 and Beyond

Ongoing implementation of the PBMAS will include the addition of new indicators, revision of current indicators, and deletion of indicators that are no longer necessary. Factors independent from the PBMAS itself are also likely to have an impact on the future versions of PBMAS. These factors include the following:

- legislatively required changes to the statewide assessment program, STAAR;
- changes resulting from reauthorizations of federal statutes, including the Elementary and Secondary Education Act;
- results of any state or federal reviews, guidance, and regulations;
- changes to data collection definitions and processes; and
- legislation from a regular or special legislative session.

Section II: Components of the 2018 PBMAS

Data Sources

Data used in the PBMAS come from a variety of sources. Student assessment data are obtained from data files provided by TEA's test contractor. Data obtained from areas within TEA include dropout and longitudinal graduation data from the Research and Analysis Division and Texas Student Data System (TSDS) Public Education Information Management System (PEIMS) data from the Statewide Education Data Systems Division. On rare occasions, a data source used in the PBMAS may be unintentionally affected by unforeseen circumstances, including natural disasters or test contractor administration issues. Should those circumstances occur, TEA will consider how or whether that data source will be used to ensure PBMAS calculations, PL assignments, and interventions are implemented appropriately and in alignment with the system's guiding principles. Specific information about data sources is included in the description of each indicator in Section III of this manual.

The calculations for each indicator are based on the most current data available and, for ease of understanding, are presented in this manual as single-year calculations. In certain instances, however, multiple years of data are combined. (See *Minimum Size Requirement (MSR) and Special Analysis (SA)* section.)

Data Exclusions

Students described under Texas Education Code, §39.053(g-3) are excluded from the computation of annual dropout rates. Any other exclusions that have been applied to a specific indicator are identified in the description of the indicator in Section III of this manual.

No Data Available for an Indicator

A district with no data available for evaluation receives a designation of *No Data*, meaning the district cannot be evaluated because of an absence of data. For example, if a district had no migrant students to report in a particular year's data collection, then for any migrant indicator based on that data collection, the PBMAS report for the district will indicate a PL of *No Data*. Districts with one or more PL designations of *No Data* should examine their local data collection and submission procedures as well as the Data Source section for each PBMAS indicator to confirm the accuracy of the *No Data* designation. It is the ongoing responsibility of districts to ensure students are coded correctly for both TSDS PEIMS and student assessment data. In addition, data validation analyses and reviews are conducted by the agency as part of its PBM activities.

Accountability Subset

Students who are enrolled in a district on October 27, 2017 (fall snapshot date) and test in the same district in the fall of 2017 or spring of 2018 are considered to be in the "accountability subset" while students who are enrolled in a district on October 27, 2017 but not enrolled in the same district for fall 2017 or spring 2018 testing are not in the accountability subset. The accountability subset for students who test in the summer of 2017 is based on the 2016 fall snapshot date. Whether the accountability subset is used for a particular indicator is noted in the description of the indicator.

Rounding

All PBMAS rates are rounded to one decimal place. For example, 79.877% is rounded to 79.9%. The intermediate results for all PBMAS significant disproportionality ratios are not rounded. This multiple decimal place precision helps ensure the accuracy of the final risk ratio value.

Masking

District data are released to each school district as allowed under the Family Educational Rights and Privacy Act (FERPA). PBMAS data released to the public are masked to protect student confidentiality. A PBMAS Masking Rules document is available on both the PBMAS district reports and data download web pages:

- <https://rptsvr1.tea.texas.gov/pbm/distrpts.html>
- <https://rptsvr1.tea.texas.gov/pbm/download.html>

Performance Levels (PLs)

A PL is the result that occurs when a standard is applied to a district's performance on an indicator. The PLs available for indicators in the 2018 PBMAS include *Not Assigned (NA)* (including *Not Assigned through SA*), *0, 0 SA, 0 RI, 1, 1 SA, 2, 2 SA, 3, 3 SA, 4, 4 SA, and SD*. SA refers to Special Analysis, which is described in the *Minimum Size Requirement (MSR) and Special Analysis (SA)* section. RI refers to Required Improvement, which is also described in a separate section. SD refers to Significant Disproportionality and is used to meet federal requirements under 34 Code of Federal Regulations (CFR) §300.647.

PBMAS indicators include a range of PLs, and each PL range has an established set of cut points. Throughout the PBMAS indicators, the higher the PL is, the lower the district's performance is.

Changes to PBMAS Cut Points

As part of the annual PBMAS development cycle, the cut points for each PBMAS indicator are evaluated. A decision to adjust cut points for one or more indicators is based on a careful consideration of the following:

- whether a state or federal goal has been identified for the indicator;
- performance of the state on each indicator at the time cut points are set;
- expected and actual improvement on the indicator over time;
- amount of improvement reasonable for the indicator;
- overall impact on the PBMAS of adjustments to cut points;
- the PBMAS system's guiding principles;
- other considerations that could affect performance on particular indicators;
- appropriate cut points across similar indicators; and
- internal and external input.

Report Only Indicators

Some PBMAS indicators are reported for district information and planning purposes. For these indicators, the district performance will be reported along with the overall state rate for the indicator. Cut points, MSR, and PLs are not typically applied to these indicators.

Generally, after a period of one or two years, PLs are assigned to Report Only indicators, and district performance on these indicators will be evaluated. The inclusion of Report Only indicators in PBMAS provides districts with an opportunity to review current performance and plan ahead.

Minimum Size Requirement (MSR) and Special Analysis (SA)

The MSR is incorporated into all indicators assigned a PL. In general, districts must have at least thirty (30) students in the relevant segment of the student population denominator to be evaluated on an indicator using the standard PBMAS analysis. In addition, for certain PBMAS indicators, districts must have at least five (5) or ten (10) students in the relevant segment of the student population numerator to be evaluated using the standard PBMAS analysis. The MSR is noted in the description of each indicator.

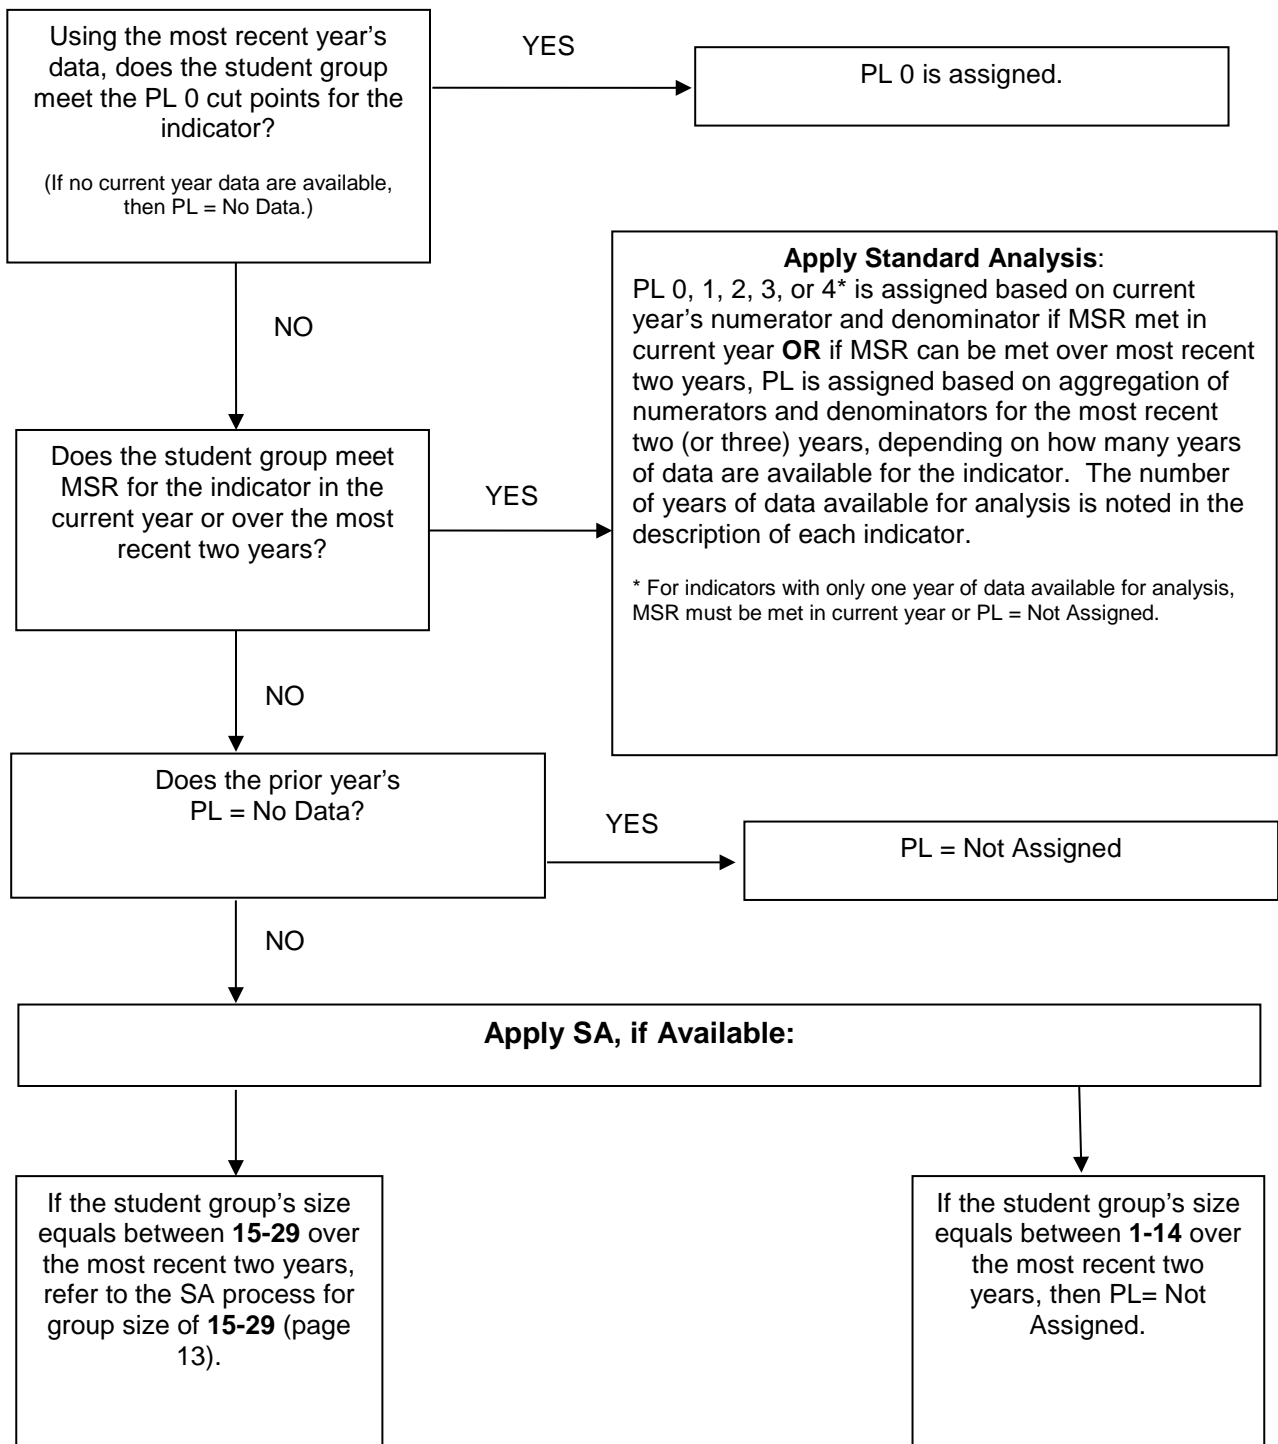

The MSR can be met either in the current year or through the aggregation of numerators and denominators over the most recent two years, if applicable. If the MSR is met for a particular performance indicator, then a district is evaluated using the standard PBMAS analysis. Under standard analysis, when the MSR is met with the current year's data, a PL is assigned based on that data in relation to the cut points for the indicator. When the MSR is met based on the most recent two years of data, the numerator and denominator for the current and prior years are aggregated, the indicator is calculated, and a PL is assigned based on the current year's cut points for the indicator. Depending on the particular indicator, there may be one or two prior years of data aggregated with the current year's data to assign a PL. If the MSR is not met, then the district may be evaluated under a process called Special Analysis (SA), which is described below.

There is one exception to the MSR. If a district does not meet the MSR for an indicator, but the performance of the district meets the criteria to earn a PL of 0, then the district receives a PL of 0, regardless of the number of students in the relevant segment of the student population.

The SA process evaluates the performance of districts that do not meet the MSR. PLs established using the SA process will have "SA" appended (*NA SA, 0 SA, 1 SA, 2 SA, 3 SA, 4 SA*) and will be included on PBMAS reports to districts, along with the district's numerators, denominators, and rates considered in the SA process.

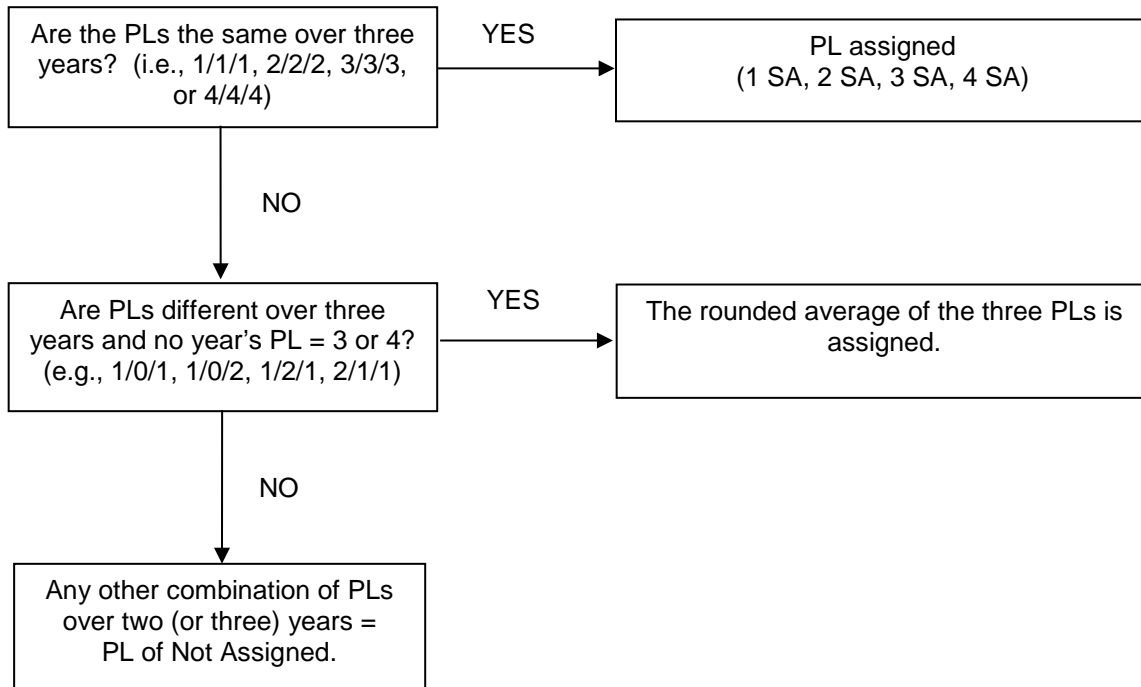

The flowcharts on the following pages depict the process for determining whether standard analysis or SA is applied in the PBMAS.

PBMAS PL Assignment and SA Determination Process

Note: For indicators eligible for the PBMAS SA process that have a MSR in both the denominator and the numerator, a district's group size is determined by the smallest denominator or numerator over the most recent two years.

PBMAS PL Assignment and SA Process for Group Size of 15-29

Note: Group size is based on the sum of the most recent two years. Previous years' PLs are determined based on the relevant years' numerators, denominators, and rates presented on the district's 2018 PBMAS report.

Required Improvement (RI)

The PBMAS, by design, has a built-in improvement component. Because the system includes a range of PLs, districts that demonstrate improvement from one year to the next can progress from one PL to another. For example, a district with 74% of its migrant students graduating with a high school diploma in four years received a PL 1 in the 2017 PBMAS. If that same district is able to improve its migrant graduation rate to 80% in 2018, it would receive a PL 0 because its performance meets the 2018 PL 0 cut point.

In addition to the system's built-in improvement component, the 2018 PBMAS will again include RI for certain indicators. The indicator descriptions in Section III of this manual will indicate if RI is available for an indicator. Examples of two PBMAS RI calculations are provided below.

RI Calculations

For the indicators where *increases* in rates are measured in *positive* numbers and RI is available, the following calculation will be used for districts that meet the MSR in both the current and previous year and have an initial PL result that is not equal to 0:

$$\begin{array}{rcl} \text{Actual Change:} & & \text{RI:} \\ \\ \text{performance in 2018} - \text{performance in 2017} & \geq & \frac{\text{minimum PL 0 cut point for 2018} - \text{performance in 2017}}{\text{number of years to reach minimum PL 0 cut point}} \end{array}$$

EXAMPLE OF RI USING ESSA INDICATOR #8: Migrant Graduation Rate	
1.	Calculate the Actual Change for the district's migrant graduation rate: $\begin{array}{rcl} \text{Actual Change:} & & \\ 72.0\% - 60.0\% & = & 12.0 \\ (2018) \quad (2017) & & \end{array}$
2.	Calculate the RI for the district's migrant graduation rate: $\begin{array}{rcl} \text{RI:} & & \\ \frac{80.0\% - 60.0\%}{2 (2019-2017)} & = & 10.0 \end{array}$
Note: The 2019 target year allows districts one year beyond 2018 to reach the 2018 minimum PL 0 cut point of 80.0%.	
3.	Compare the two numbers to see if the Actual Change is greater than or equal to the RI : $12.0 > 10.0$. (Gains in graduation rates are measured in <i>positive</i> numbers.)
4.	Result: the district meets RI and receives a PL of 0 RI.

For indicators where *reductions* in rates are measured in *negative* numbers and RI is available, the following calculation will be used for districts that meet the MSR in both the current and previous year and have an initial PL result that is not equal to 0. Note that for these types of indicators, actual change needs to be *less than or equal to RI* for the PL 0 cut point to be met.

$$\begin{array}{l} \text{Actual Change:} \\ \text{performance in 2018} - \text{performance in 2017} \leq \frac{\text{RI:} \\ \text{maximum PL 0 cut point for 2018} - \text{performance in 2017}}{\text{number of years to reach maximum PL 0 cut point}} \end{array}$$

EXAMPLE OF RI USING SPECIAL EDUCATION INDICATOR #5: SPED Annual Dropout Rate (Grades 7-12)	
1. Calculate the Actual Change for the district's SPED annual dropout rate:	<p><u>Actual Change:</u></p> $\begin{array}{rcccl} 3.8\% & - & 8.1\% & = & -4.3 \\ (2018) & & (2017) & & \end{array}$
2. Calculate the RI for the district's SPED annual dropout rate:	<p><u>RI:</u></p> $\frac{1.8\% - 8.1\%}{2 (2019-2017)} = -3.2$
<p>Note: The 2019 target year allows districts one year beyond 2018 to reach the 2018 maximum PL 0 cut point of 1.8%.</p>	
3. Compare the two numbers to see if the Actual Change is less than or equal to the RI : $-4.3 < -3.2$. (Reductions in annual dropout rates are measured in <i>negative</i> numbers.)	
4. Result: the district meets RI and receives a PL of 0 RI.	

System Safeguards

System safeguard activities are conducted by TEA to ensure the integrity of the PBM system. These activities include data validation analyses of leaver data, student assessment data, and discipline data. Random or other means of selection are also implemented to verify system effectiveness and districts' implementation of monitoring requirements.

Monitoring Interventions

The Office of Academics (OoA) will notify each district selected for a 2018 PBMAS intervention of its intervention stage and will provide further instructions via the listserv for "To the Administrator Addressed" (TAA) correspondence. It is each district's obligation to access TAA correspondence; registration is available at: https://tea.texas.gov/taa_letters.aspx.

Section III: Performance Indicators

*Bilingual Education/English as a Second Language
(BE/ESL)*

Indicators (1 – 9)

BE/ESL Indicator #1(i-v): BE STAAR 3-8 Passing Rate

This indicator measures the percent of students served in bilingual education (BE) who met the minimum level of satisfactory performance or higher on the STAAR 3-8 assessments (mathematics, reading, science, social studies, and writing).

Calculation

$$\frac{\text{number of BE STAAR 3-8 [subject (i-v)] passers}}{\text{number of BE STAAR 3-8 [subject (i-v)] takers}}$$

Data Source

The data for this indicator are based on the performance of students reported by the district on the TSDS PEIMS 40110 Sub-Category as enrolled in the district and also reported on the STAAR assessments as participating in a state-approved bilingual program (bilingual program indicator codes 2, 3, 4, or 5).

Overall Processing Criteria

- MSR: Denominator ≥ 30
- RI: Yes
- SA: Yes
- Year(s) of Data Available for Analysis: 3
- Accountability Subset: Yes
- Test Administrations: Spring 2018 and May 2018 SSI retest
- Applicable TSDS PEIMS Collections: Fall 2017
- Section II of this manual includes detailed information on these and other PBMAS components.

PL Assignment

Each district's BE STAAR 3-8 passing rate is compared to the PBMAS cut points for the indicator, and PLs are assigned as follows:

BE/ESL Indicator	PL 0	PL 1	PL 2	PL 3

SPED Indicator	PL 0	PL 1	PL 2	PL 3
9	0% - 10.0%	10.1% - 18.9%	19.0% - 20.9%	21.0% - 100%

As required by federal regulations under 34 CFR Part 300, each district's SPED regular class <40% rate is also disaggregated by the following racial and ethnic groups: (1) Hispanic/Latino; (2) American Indian or Alaska Native; (3) Asian; (4) Black or African American; (5) Native Hawaiian or Other Pacific Islander; (6) White; and (7) Two or More Races. PLs of significant disproportionality will be assigned for any racial/ethnic group if the racial/ethnic group's risk ratio exceeds 2.5.

Significant Disproportionality (SD) Risk Ratio	PL SD (Year 1) or SD (Year 2)

- Significant disproportionality risk ratio calculations are based on one year of data.
- Per federal regulations (34 CFR §300.647), a significant disproportionality risk ratio is not calculated when a district does not meet the MSR for a particular racial or ethnic group. However, if a district meets the MSR for a particular racial or ethnic group but not for the comparison "other students" group, these federal regulations require a significant disproportionality risk ratio be calculated based on the alternate risk ratio, which uses the rates for "other students" in the state. If a district's significant disproportionality PL was based on the alternate risk ratio, it will be so noted on the district's PBMAS report.
- The intermediate results for significant disproportionality risk ratios are not rounded. This multiple decimal place precision helps ensure the accuracy of the final risk ratio values.

- For SD PLs based on 2016-2017 data, the student's age, derived from the TSDS PEIMS 40100 Sub-Category (Element E0006), must be at least 3 as of October 28, 2016 and less than 22 as of September 1, 2016.
- Students whose attribution code on the TSDS PEIMS 40110 Sub-Category (Element E1000) is 12 (private school) are not included in the calculation of this indicator in either the numerator or denominator.
- A student is counted as a special education student in the denominator if (a) any 42405 Sub-Category was submitted for the student; (b) Element E0940 on any 42400 Sub-Category submitted for the student contains anything but 000; (c) any 42505 Sub-Category was submitted for the student; or (d) Element E1049 on any 42500 Sub-Category submitted for the student contains anything but 000.
- The actual length of a disciplinary assignment included in this indicator must be greater than zero.
- A complete list and descriptions of all instructional settings can be found in the TEDS available at: https://www.texasstudentdatasystem.org/TSDS/TEDS/TEDS_Latest_Release/.
- Significant disproportionality risk ratio calculations are based on one year of data.
- Per federal regulations (34 CFR §300.647), a significant disproportionality risk ratio is not calculated when a district does not meet the MSR for a particular racial or ethnic group. However, if a district meets the MSR for a particular racial or ethnic group but not for the comparison "other students" group, these federal regulations require a significant disproportionality risk ratio be calculated based on the alternate risk ratio, which uses the rates for "other students" in the state. If a district's significant disproportionality PL was based on the alternate risk ratio, it will be so noted on the district's report.
- The intermediate results for significant disproportionality risk ratios are not rounded. This multiple decimal place precision helps ensure the accuracy of the final risk ratio values.

SPED Indicator #13: SPED OSS and Expulsion >10 Days Rate (Ages 3-21)

This indicator measures the disaggregated percent of students ages 3-21 served in special education (SPED) reported as suspended out-of-school (OSS) or expelled for more than 10 school days.

Section IV: Appendices

Appendix: A – Career and Technical Education Nontraditional Courses (2016-2017 School Year)

The federal Carl D. Perkins law requires states to measure participation in nontraditional courses. Nontraditional courses are defined as occupations or fields of work, including careers in computer science, technology, and other emerging high skill occupations, for which individuals from one gender comprise less than 25 percent of the individuals employed in each such occupation or field of work. The courses below were selected because, generally, they are occupationally specific courses in which the enrollment of one gender falls below 25 percent. Gender enrollments in the courses are reviewed annually at the state and local levels as part of the Carl D. Perkins reporting process.

Appendix: B – Comments, Questions, and Review of Incorrect PL Assignments

The Texas Education Agency welcomes comments and questions concerning PBMAS district PLs. In addition, if a district determines that one or more 2018 PBMAS PL assignments were based on a data or calculation error attributable to the agency or one of the agency’s data contractors, the district should submit specific information about the error, no later than September 14, 2018, to the address below. Requests based on disagreement with the 2018 PBMAS indicators, cut points, and methodologies adopted in rule or requests based on districts’ data errors will not be considered.
