§128.11. Spanish Language Arts and Reading, Kindergarten, Beginning with School Year 2009-2010.

- (a) Introduction.
 - (1) The Spanish Language Arts and Reading Texas Essential Knowledge and Skills (TEKS) reflect language arts standards that are authentic to the Spanish language and Spanish literacy, not mere translations from English. The Spanish Language Arts and Reading TEKS are organized into the following strands: Reading, where students read and understand a wide variety of literary and informational texts; Writing, where students compose a variety of written texts with a clear controlling idea, coherent organization, and sufficient detail; Research, where students are expected to know how to locate a range of relevant sources and evaluate, synthesize, and present ideas and information; Listening and Speaking, where students listen and respond to the ideas of others while contributing their own ideas in conversations and in groups; and Oral and Written Conventions, where students learn how to use the oral and written conventions of the Spanish language in speaking and writing. The Reading strand is structured to reflect major topic areas of the National Reading Panel Report as well as other current and relevant research on Spanish literacy development. In Kindergarten, students engage in activities that build on their natural curiosity and prior knowledge to develop their reading, writing, and oral language skills. Students should be read to on a daily basis.
 - (2) Research consistently shows that literacy development in the student's native language facilitates learning in English (Collier & Thomas, 1997; Cummins, 2001). Students can develop cognition, learn, and achieve best when they can understand the language of instruction (August, Calderon, & Carlo, 2003). Students who have strong literacy skills in their primary language can be expected to transfer those skills to English and *progress rapidly* in learning in English. Although English and Spanish look very similar on the surface (i.e., similar alphabets; directionality; cognates) the conventions of each language presuppose the reading process in that language. Consequently, systematic instruction in the appropriate sequence of skills is critical. For this reason, the Spanish Language Arts and Reading TEKS reflect language arts standards that are authentic to the Spanish language and not mere translations from English.
 - (A) Spanish, as opposed to English, has a closer letter-sound relationship and clearly defined syllable boundaries. The syllable in Spanish is a more critical unit of phonological awareness than in English because of the consistent phoneme-grapheme correspondence.

Syllables are important units for Spanish because of their strong effect in visual word recognition (Carreiras et al., 1993) and their major role in predicting Spanish reading success. In addition, Spanish presents a much higher level of orthographic transparency than English and does not rely on sight words for decoding. This orthographic transparency accelerates the decoding process, and the focus quickly moves to fluency and comprehension. Spanish uses frequency words that are identified by the rate of occurrence in grade appropriate text and used to build on fluency and comprehension. However, in English, "sight" words are used because of words that are not decodable such as "are" or "one." In Spanish, decoding issues are not as prevalent as issues of comprehension. These specific features of the Spanish language will influence reading methodology and development.

- (B) Spanish instruction maximizes access to English content. Students with strong literacy skills in Spanish phonemic awareness, phonics, vocabulary, and reading comprehension can be expected to transfer those skills to English. The "transfer" of knowledge and skills from one language to another refers to the metalinguistic and metacognitive processes and awareness that students gain in developing literacy in two languages. Current research on bilingual instruction (e.g., August & Shanahan, 2006; Genesse et al., 2006) shows how students use native literacy knowledge when learning to read and write in another language.
 - (C) The effective transfer of skills transpires as students develop their metalinguistic skills and as they engage in a contrastive analysis of the Spanish and English languages (Cummins, 2007). Transfer matters occur within fundamentals of language that are common to Spanish and English; within fundamentals that are similar, but not exact in both languages; and in fundamentals specific to each language and not applicable to the other language. The strength of learning through formal instruction in Spanish determines the extent of transfer in English (August, Calderon, & Carlo, 2000; Slavin & Calderon, 2001; Garcia, 2001). In other words, for transfer to occur, comprehension of the "rules" and the realization of their applicability to the new language specific tasks are necessary.
 - (D) The concept of transfer necessitates the use of some of both languages in which both (Spanish and English) *co-exist with flexibility*. As a result of working within two language systems, students' metalinguistic and metacognitive skills are enhanced when they learn about the similarities and differences between languages. This is *reliant* on the type of bilingual program model being used (See Texas Education Code, §29.066).
- (3) To meet Public Education Goal 1 of the Texas Education Code, §4.002, which states, "The students in the public education system will demonstrate exemplary performance in the reading and writing of the English language," students will accomplish the essential knowledge, skills, and student expectations at Kindergarten as described in subsection (b) of this section.
 - (4) To meet Texas Education Code, §28.002(h), which states, "... each school district shall foster the continuation of the tradition of teaching United States and Texas history and the free enterprise system in regular subject matter and in reading courses and in the adoption of textbooks," students will be provided oral and written narratives as well as other informational texts that can help them to become thoughtful, active citizens who appreciate the basic democratic values of our state and nation.

§128.13. Spanish Language Arts and Reading, Grade 2, Beginning with School Year 2009-2010.

- (a) Introduction.
- (1) The Spanish Language Arts and Reading Texas Essential Knowledge and Skills (TEKS) reflect language arts standards that are authentic to the Spanish language and Spanish literacy, not mere translations from English. The Spanish Language Arts and Reading TEKS are organized into the following strands: Reading, where students read and understand a wide variety of literary and informational texts; Writing, where students compose a variety of written texts with a clear controlling idea, coherent organization, and sufficient detail; Research, where students are expected to know how to locate a range of relevant sources and evaluate, synthesize, and present ideas and information; Listening and Speaking, where students listen and respond to the ideas of others while contributing their own ideas in conversations and in groups; and Oral and Written Conventions, where students learn how to use the oral and written conventions of the Spanish language in speaking and writing. The Reading strand is structured to reflect major topic areas of the National Reading Panel Report as well as other current and relevant research on Spanish literacy development. In second grade, students will engage in activities that build on their prior knowledge and skills in order to strengthen their reading, writing, and oral language skills. Students should write, read, and be read to on a daily basis.
- (2) Research consistently shows that literacy development in the student's native language facilitates learning in English (Collier & Thomas, 1997; Cummins, 2001). Students can develop cognition, learn, and achieve best when they can understand the language of instruction (August, Calderon, & Carlo, 2003). Students who have strong literacy skills in their primary language can be expected to transfer those skills to English and *progress rapidly* in learning in English. Although English and Spanish look very similar on the surface (i.e., similar alphabets; directionality; cognates) the conventions of each language presuppose the reading process in that language. Consequently, systematic instruction in the appropriate sequence of skills is critical. For this reason, the Spanish

Language Arts and Reading TEKS reflect language arts standards that are authentic to the Spanish language and not mere translations from English.

- (A) Spanish, as opposed to English, has a closer letter-sound relationship and clearly defined syllable boundaries. The syllable in Spanish is a more critical unit of phonological awareness than in English because of the consistent phoneme-grapheme correspondence. Syllables are important units for Spanish because of their strong effect in visual word recognition (Carreiras et al., 1993) and their major role in predicting Spanish reading success. In addition, Spanish presents a much higher level of orthographic transparency than English and does not rely on sight words for decoding. This orthographic transparency accelerates the decoding process and the focus quickly moves to fluency and comprehension. Spanish uses frequency words that are identified by the rate of occurrence in grade appropriate text and used to build on fluency and comprehension. However, in English, "sight" words are used because of words that are not decodable such as "are" or "one." In Spanish, decoding issues are not as prevalent as issues of comprehension. These specific features of the Spanish language will influence reading methodology and development.
 - (B) Spanish instruction maximizes access to English content. Students with strong literacy skills in Spanish phonemic awareness, phonics, vocabulary, and reading comprehension can be expected to transfer those skills to English. The "transfer" of knowledge and skills from one language to another refers to the metalinguistic and metacognitive processes and awareness that students gain in developing literacy in two languages. Current research on bilingual instruction (e.g., August & Shanahan, 2006; Genesse et al., 2006) shows how students use native literacy knowledge when learning to read and write in another language.
 - (C) The effective transfer of skills transpires as students develop their metalinguistic skills and as they engage in a contrastive analysis of the Spanish and English languages (Cummins, 2007). Transfer matters occur within fundamentals of language that are common to Spanish and English; within fundamentals that are similar, but not exact in both languages; and in fundamentals specific to each language and not applicable to the other language. The strength of learning through formal instruction in Spanish determines the extent of transfer in English (August, Calderon, & Carlo, 2000; Slavin & Calderon, 2001; Garcia, 2001). In other words, for transfer to occur, comprehension of the "rules" and the realization of their applicability to the new language specific tasks are necessary.
 - (D) The concept of transfer necessitates the use of some of both languages in which both (Spanish and English) *co-exist with flexibility*. As a result of working within two language systems, students' metalinguistic and metacognitive skills are enhanced when they learn about the similarities and differences between languages. This is *reliant* on the type of bilingual program model being used (See Texas Education Code, §29.066).
- (3) To meet Public Education Goal 1 of the Texas Education Code, §4.002, which states, "The students in the public education system will demonstrate exemplary performance in the reading and writing of the English language," students will accomplish the essential knowledge, skills, and student expectations at Grade 2 as described in subsection (b) of this section.
 - (4) To meet Texas Education Code, §28.002(h), which states, "... each school district shall foster the continuation of the tradition of teaching United States and Texas history and the free enterprise system in regular subject matter and in reading courses and in the adoption of textbooks," students will be provided oral and written narratives as well as other informational texts that can help them to become thoughtful, active citizens who appreciate the basic democratic values of our state and nation.
- (b) Knowledge and skills.
 - (1) Reading/Beginning Reading Skills/Print Awareness. Students understand how Spanish is written and printed. Students are expected to distinguish features of a sentence (e.g., capitalization of first

word, beginning and ending punctuation, commas, quotation marks, and em dash to indicate dialogue).

- (2) Reading/Beginning Reading Skills/Phonics. Students use the relationships between letters and sounds and spelling based on orthographic rules to decode written Spanish. Students will continue to apply earlier standards with greater depth in increasingly more complex texts. Students are expected to:
- (A) decode words in context and in isolation by applying the knowledge of letter-sound relationships in different syllabic structures, including:
 - (i) open syllable (CV) (e.g., la/la-ta; to/to-ma);
 - (ii) closed syllable (CVC) (e.g., mes, sol);
 - (iii) diphthongs (e.g., viernes, pie, fui);
 - (iv) hiatus (e.g., fideo, poeta);
 - (v) consonant blends (e.g., bra/bra-zo; glo/glo-bo); and
 - (vi) consonant digraphs (e.g., ch/chi-le; ll/lla-ve; rr/pe-rro);
 - (B) use orthographic rules to segment and combine syllables including vowel diphthongs (e.g., pue-de, sien-te, va-ca);
 - (C) decode words with silent "h" with increasing accuracy;
 - (D) become familiar with words that use syllables que-, qui-, as in queso and quito; gue-, gui-, as in guiso and juguete; and güe-, güi-, as in pingüino and agüita;
 - (E) decode words that have same sounds represented by different letters with increased accuracy (e.g., "r" and "rr," as in ratón and perro; "ll" and "y," as in llave and yate; "g" and "j," as in gigante and jirafa; "c," "k," and "q," as in casa, kilo, and quince; "c," "s," and "z," as in cereal, semilla, and zapato; "j" and "x," as in cojín and México; "i" and "y," as in imán and doy; "b" and "v," as in burro and vela);
 - (F) read words with common prefixes (e.g., in-, des-) and suffixes (e.g., -mente, -dad, -oso);
 - (G) identify and read abbreviations (e.g., Sr., Dra.);
 - (H) identify the stressed syllable (*sílaba tónica*);

 - (D) alphabetize a series of words and use a dictionary or a glossary to find words.
- (6) Reading/Comprehension of Literary Text/Theme and Genre. Students analyze, make inferences and draw conclusions about theme and genre in different cultural, historical, and contemporary contexts and provide evidence from the text to support their understanding. Students are expected to:

§128.15. Spanish Language Arts and Reading, Grade 4, Beginning with School Year 2009-2010.

- (a) Introduction.
 - (1) The Spanish Language Arts and Reading Texas Essential Knowledge and Skills (TEKS) reflect language arts standards that are authentic to the Spanish language and Spanish literacy, not mere translations from English. The Spanish Language Arts and Reading TEKS are organized into the following strands: Reading, where students read and understand a wide variety of literary and informational texts; Writing, where students compose a variety of written texts with a clear controlling idea, coherent organization, and sufficient detail; Research, where students are expected to know how to locate a range of relevant sources and evaluate, synthesize, and present ideas and information; Listening and Speaking, where students listen and respond to the ideas of others while contributing their own ideas in conversations and in groups; and Oral and Written Conventions, where students learn how to use the oral and written conventions of the Spanish language in speaking and writing. The standards are cumulative--students will continue to address earlier standards as needed while they attend to standards for their grade. In fourth grade, students will engage in activities that build on their prior knowledge and skills in order to strengthen their reading, writing, and oral language skills. Students should read, write, and be read to on a daily basis.
 - (2) Research consistently shows that literacy development in the student's native language facilitates learning in English (Collier & Thomas, 1997; Cummins, 2001). Students can develop cognition, learn, and achieve best when they can understand the language of instruction (August, Calderon, & Carlo, 2003). Students who have strong literacy skills in their primary language can be expected to transfer those skills to English and *progress rapidly* in learning in English. Although English and Spanish look very similar on the surface (i.e., similar alphabets; directionality; cognates) the conventions of each language presuppose the reading process in that language. Consequently, systematic instruction in the appropriate sequence of skills is critical. For this reason, the Spanish

Language Arts and Reading TEKS reflect language arts standards that are authentic to the Spanish language and not mere translations from English.

- (A) Spanish, as opposed to English, has a closer letter-sound relationship and clearly defined syllable boundaries. The syllable in Spanish is a more critical unit of phonological awareness than in English because of the consistent phoneme-grapheme correspondence. Syllables are important units for Spanish because of their strong effect in visual word recognition (Carreiras et al., 1993) and their major role in predicting Spanish reading success. In addition, Spanish presents a much higher level of orthographic transparency than English and does not rely on sight words for decoding. This orthographic transparency accelerates the decoding process, and the focus quickly moves to fluency and comprehension. Spanish uses frequency words that are identified by the rate of occurrence in grade appropriate text and used to build on fluency and comprehension. However, in English, "sight" words are used because of words that are not decodable such as "are" or "one." In Spanish, decoding issues are not as prevalent as issues of comprehension. These specific features of the Spanish language will influence reading methodology and development.
 - (B) Spanish instruction maximizes access to English content. Students with strong literacy skills in Spanish phonemic awareness, phonics, vocabulary, and reading comprehension can be expected to transfer those skills to English. The "transfer" of knowledge and skills from one language to another refers to the metalinguistic and metacognitive processes and awareness that students gain in developing literacy in two languages. Current research on bilingual instruction (e.g., August & Shanahan, 2006; Genesse et al., 2006) shows how students use native literacy knowledge when learning to read and write in another language.
 - (C) The effective transfer of skills transpires as students develop their metalinguistic skills and as they engage in a contrastive analysis of the Spanish and English languages (Cummins, 2007). Transfer matters occur within fundamentals of language that are common to Spanish and English; within fundamentals that are similar, but not exact in both languages; and in fundamentals specific to each language and not applicable to the other language. The strength of learning through formal instruction in Spanish determines the extent of transfer in English (August, Calderon, & Carlo, 2000; Slavin & Calderon, 2001; Garcia, 2001). In other words, for transfer to occur, comprehension of the "rules" and the realization of their applicability to the new language specific tasks are necessary.
 - (D) The concept of transfer necessitates the use of some of both languages in which both (Spanish and English) *co-exist with flexibility*. As a result of working within two language systems, students' metalinguistic and metacognitive skills are enhanced when they learn about the similarities and differences between languages. This is *reliant* on the type of bilingual program model being used (See Texas Education Code, §29.066).
- (3) To meet Public Education Goal 1 of the Texas Education Code, §4.002, which states, "The students in the public education system will demonstrate exemplary performance in the reading and writing of the English language," students will accomplish the essential knowledge, skills, and student expectations at Grade 4 as described in subsection (b) of this section.
 - (4) To meet Texas Education Code, §28.002(h), which states, "... each school district shall foster the continuation of the tradition of teaching United States and Texas history and the free enterprise system in regular subject matter and in reading courses and in the adoption of textbooks," students will be provided oral and written narratives as well as other informational texts that can help them to become thoughtful, active citizens who appreciate the basic democratic values of our state and nation.

§128.16. Spanish Language Arts and Reading, Grade 5, Beginning with School Year 2009-2010.

- (a) Introduction.
 - (1) The Spanish Language Arts and Reading Texas Essential Knowledge and Skills (TEKS) are organized into the following strands: Reading, where students read and understand a wide variety of literary and informational texts; Writing, where students compose a variety of written texts with a clear controlling idea, coherent organization, and sufficient detail; Research, where students are expected to know how to locate a range of relevant sources and evaluate, synthesize, and present ideas and information; Listening and Speaking, where students listen and respond to the ideas of others while contributing their own ideas in conversations and in groups; and Oral and Written Conventions, where students learn how to use the oral and written conventions of the Spanish language in speaking and writing. The standards are cumulative--students will continue to address

earlier standards as needed while they attend to standards for their grade. In fifth grade, students will engage in activities that build on their prior knowledge and skills in order to strengthen their reading, writing, and oral language skills. Students should read, write, and be read to on a daily basis.

- (2) Research consistently shows that literacy development in the student's native language facilitates learning in English (Collier & Thomas, 1997; Cummins, 2001). Students can develop cognition, learn, and achieve best when they can understand the language of instruction (August, Calderon, & Carlo, 2003). Students who have strong literacy skills in their primary language can be expected to transfer those skills to English and *progress rapidly* in learning in English. Although English and Spanish look very similar on the surface (i.e., similar alphabets; directionality; cognates) the conventions of each language presuppose the reading process in that language. Consequently, systematic instruction in the appropriate sequence of skills is critical. For this reason, the Spanish Language Arts and Reading TEKS reflect language arts standards that are authentic to the Spanish language and not mere translations from English.
 - (A) Spanish, as opposed to English, has a closer letter-sound relationship and clearly defined syllable boundaries. The syllable in Spanish is a more critical unit of phonological awareness than in English because of the consistent phoneme-grapheme correspondence. Syllables are important units for Spanish because of their strong effect in visual word recognition (Carreiras et al., 1993) and their major role in predicting Spanish reading success. In addition, Spanish presents a much higher level of orthographic transparency than English and does not rely on sight words for decoding. This orthographic transparency accelerates the decoding process and the focus quickly moves to fluency and comprehension. Spanish uses frequency words that are identified by the rate of occurrence in grade appropriate text and used to build on fluency and comprehension. However, in English, "sight" words are used because of words that are not decodable such as "are" or "one." In Spanish, decoding issues are not as prevalent as issues of comprehension. These specific features of the Spanish language will influence reading methodology and development.
 - (B) Spanish instruction maximizes access to English content. Students with strong literacy skills in Spanish phonemic awareness, phonics, vocabulary, and reading comprehension can be expected to transfer those skills to English. The "transfer" of knowledge and skills from one language to another refers to the metalinguistic and metacognitive processes and awareness that students gain in developing literacy in two languages. Current research on bilingual instruction (e.g., August & Shanahan, 2006; Genesse et al., 2006) shows how students use native literacy knowledge when learning to read and write in another language.
 - (C) The effective transfer of skills transpires as students develop their metalinguistic skills and as they engage in a contrastive analysis of the Spanish and English languages (Cummins, 2007). Transfer matters occur within fundamentals of language that are common to Spanish and English; within fundamentals that are similar, but not exact in both languages; and in fundamentals specific to each language and not applicable to the other language. The strength of learning through formal instruction in Spanish determines the extent of transfer in English (August, Calderon, & Carlo, 2000; Slavin & Calderon, 2001; Garcia, 2001). In other words, for transfer to occur, comprehension of the "rules" and the realization of their applicability to the new language specific tasks are necessary.
 - (D) The concept of transfer necessitates the use of both languages in which both (Spanish and English) *co-exist with flexibility*. As a result of working within two language systems, students' metalinguistic and metacognitive skills are enhanced when they learn about the similarities and differences between languages. This is *reliant* on the type of bilingual program model being used (See Texas Education Code, §29.066).
- (3) To meet Public Education Goal 1 of the Texas Education Code, §4.002, which states, "The students in the public education system will demonstrate exemplary performance in the reading and

writing of the English language," students will accomplish the essential knowledge, skills, and student expectations at Grade 5 as described in subsection (b) of this section.

- (4) To meet Texas Education Code, §28.002(h), which states, "... each school district shall foster the continuation of the tradition of teaching United States and Texas history and the free enterprise system in regular subject matter and in reading courses and in the adoption of textbooks," students will be provided oral and written narratives as well as other informational texts that can help them to become thoughtful, active citizens who appreciate the basic democratic values of our state and nation.
